

ProjExec® Online

The SaaS Solution for Collaborative Project Management

**Real-time Collaborative Project Management •
Secure • Reliable • Affordable •**

Project Success On Demand™

As collaborative project management extends well beyond a single enterprise, today's distributed project teams require simple, reliable and affordable project networks that connect users real-time, anytime, with anyone, from anywhere.

Serving the Project Collaboration Needs of Highly Distributed Teams

Projects in our fast-paced global workplace are seldom accomplished by a single entity. Today's project teams likely consist of employees from one location, partners from another, and suppliers, customers and stakeholders scattered well beyond the enterprise with no time zone, geography or tool sets in common.

Effective project collaboration is most challenging for smaller organizations. While all businesses share the imperative to collaborate efficiently with partners, customers, and suppliers, those in the SMB tier typically lack the vast resources necessary to establish a network for project success.

Distributed project teams – particularly those in mid-market companies – need secure, reliable and affordable project collaboration anytime, from anywhere. Cost, complexity, and size should not stand in the way of delivering this strategic capability.

Designed from the ground up as an on demand service, ProjExec® Online instantly delivers an affordable project collaboration solution while eliminating any IT hassle to meet the needs of all distributed project teams, quickly and easily.

The ProjExec® Online Service

ProjExec Online is a collaborative project management solution offered in a Software-as-a-Service (SaaS) delivery model for low-risk and low-cost access to one-stop project management and real-time collaboration. ProjExec Online eliminates the middleware barrier to enable companies of all types and sizes to use best-of-breed tools and methodologies collaboratively throughout all phases of the project life cycle. With its cost effective pay-as-you-go ease and convenience, ProjExec Online allows teams to achieve

« Project Success On Demand™ ».

The Project Life Cycle

1

Initiation

- Definition of project goals
- Team selection

- The first collaborative project management solution built on IBM WebSphere Portal in a SaaS model
- IBM commitment to openness and extensibility, makes ProjExec Online a scalable on-demand solution for any size organization
- Secure managed hosted services from a world class data center
- Critical 24/7 support

Benefits

Hassle Free. Collaborate on projects with multiple participants without the hassle and expense of buying and hosting on-premise applications and servers.

Flexibility. Expand according to need and invite users on demand; streamline project operations with clients, suppliers and partners.

Customization. Configurable solution depending on business and project requirements.

Productivity. Implement best practices and anticipate problems in real-time with simple and intuitive embedded tools and secure, role-based functionality.

> SMALL AND MID-SIZED BUSINESSES

Productivity. Automate daily project management tasks and save valuable time.

Control. Control the progress of multiple projects. Receive automatic alerts and notifications. Simplify tracking of issues and changes.

Compliance. Simplify implementation of project management best practices, recommended by PMI (Project Management Institute).

Compatibility. Synchronize project schedule with MS Project and export data to Excel and other applications using standard formats (XML, CSV).

> PROJECT MANAGERS

Simplicity. Access all information using a highly intuitive web browser interface integrated with all the tools required.

Collaboration. Simple and intuitive means to contribute, organize and share communication and information relative to a specific project: instant messaging, presence awareness, on line conferencing, discussion forums etc...

Organization. Simplify storage, classification and data retrieval, such as documents, issues, discussions, etc... View collaboration history on documents. Access relevant information first, according to project-specific role.

Reporting. Communicate task progress and submit time sheets for approval for all projects from a single form.

> DISTRIBUTED TEAMS

Why Choose ProjExec® Online?

Software-as-a-Service is an emerging software delivery model that by 2011 Gartner predicts will account for 25 percent of new business software being delivered.* With so many vendors launching online services for project management in the SaaS delivery model, why choose ProjExec Online?

One very compelling reason is that ProjExec Online is the first collaborative project management offering built on IBM WebSphere Portal in a SaaS delivery model.

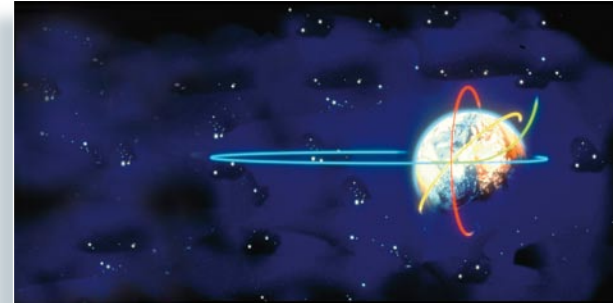

Running on top of enterprise-class, secure and reliable IBM's middleware makes ProjExec

Online a scalable on-demand

solution for any size organization with any level of project complexity. With ProjExec Online, even the smallest company can benefit from IBM's leading enterprise portal technology along with IBM Lotus Sametime instant messaging and web conferencing – all for one low, affordable monthly price.

Add superior inter-enterprise project collaboration and workflow capabilities - real-time, anytime, with anyone, from anywhere – delivered through an intuitive Web 2.0 user interface that synchronizes with Microsoft® Project, and you get the best business value for enterprises both large and small.

* "Predicts 2007: Software as a Service Provides a Viable Delivery Model," Gartner, November 2006.

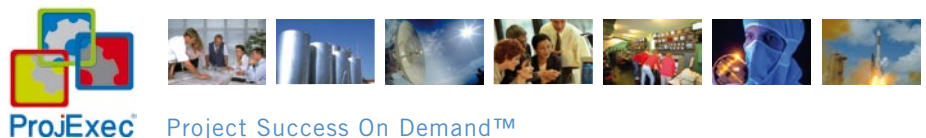

Try and Buy

Try ProjExec® Online FREE for 30 days with absolutely no obligation or subscribe for a low monthly fee and see the benefits of true collaborative project management. Visit www.projexec.com and experience the faster, reliable and most affordable service for project success on demand.
